Electric Salamander ES-650 Use Manual

Please read this use manual carefully before operating this equipment.

First of all, thank you very much for choosing our products.

The actual scope of supply may deviate from the description and description described herein if there is a special structure, additional specified options or due to changes in new technologies. If you have any questions, please contact the manufacturer.

In order to give full play to the performance of this product and reduce unnecessary losses and injuries, please read the operation guide carefully before starting any operation on the device, especially before starting the device!

The manufacturer is not liable for any damage or negligence caused by non-compliance with the operational guidelines.

This instruction should be placed directly on the device so that the operator can easily access it. Within the scope of improving performance characteristics and further development, we have the right to retain technical changes to our products.

Warning

1. Any modification, incorrect installation, adjustment, repairs or maintenance may result in property loss or casualties. If necessary, the modification or maintenance should be liaised with the supplier and carried out by trained professionals;
2. For your safety, please do not store or use inflammable and explosive gases, liquids or articles near this product;
3. The equipment shall not be used by persons with physical, perceptual or psychological disabilities or lack of experience or knowledge (including children), Unless someone supervises their safety or gives instructions on how to operate the device;
4. Please monitor children to ensure that they do not play with equipment.
5. Please be careful to store operating instructions. If the device is used by a third party, please submit the operating instructions to use. All users of the device must adhere to the operating instructions and safety guidelines.
6. Flammable and explosive gases, liquids or articles should not be stored or used near usage areas.
7. If appliances are located close to walls, partitions, kitchen equipment and trim panel, it is recommended that these equipment and facilities be made of non-combustible materials, otherwise they should be covered with appropriate non-combustible insulation materials, and pay close attention to fire protection regulations.

I、Product Profile:

ES-650 Electric Salamander is made of high-quality stainless steel, with a luxurious, beautiful, clean and hygienic appearance. Use high-quality electrical components, energy-saving and safe. With constant temperature function, easy to operate. With complete functions and high quality, it is the first choice for hotels, bars, western restaurants, fast food restaurants and other places.

II、Basic parameters:

Model	Voltage	Power (kW)	Number of layers	Product size(mm)	N.G.(kg)	Mark
ES-650	230V~50Hz	2	3 layers	646x320x280	12.5	

III、Symbols description:

In this specification, symbols are used to highlight all important safety instructions and recommendations related to equipment. In order to avoid accident risk, casualties or property losses, please follow these instructions with special care.

Equipotential

Ground wire

VI、Working principle

KT: Timer ST: Thermostat HL: Heating indicator EH: Heating pipe

V、 Notes:

1. This manual does not apply to people who are physically, sensory and intellectually deficient, or lack experience and knowledge.
2. It is strictly prohibited to place flammable and explosive materials around the stove, and a good ventilation environment shall be maintained.
3. When using the electric salamander, non-workers should not approach the electric heating surface stove, and do not let children touch the body to avoid burns.
4. When the electric salamander is not in use, unplug the power plug or cut off the power switch to avoid accidents.
5. All maintenance work must be performed after the power is turned off.
6. If the electric salamander fails, including damage to the power cord, do not disassemble it by yourself, please send it to the company's special maintenance department or dealer for repair.

VI、 Operating Instruction:

Before use, check whether the power supply voltage is consistent with the nameplate, and whether the power switch and fuse of the user meet the power requirements of the machine. The housing must be reliably grounded.

Operation steps:

1. First place the machine firmly.
2. Set the timer to the zero position, set the stepless thermostat to the OFF position, and switch on the power supply. Adjust the timer knob to the required time, and the stepless thermostat to the required position. At this time, the orange work indicator lights up and the heating tube starts to be energized and heated.
3. The stepless thermostat controls the length of time that the circuit is closed and disconnected before the 3rd gear. When it is adjusted to the 3rd gear, the circuit will always be closed and the heating tube will be heated all the time. The user can put the food that needs to be heated or roasted on the inner rack, and the user can adjust the temperature and the height of the three layers as needed. (Note: When the timer is at the zero position, the heating tube will not heat up)
4. When you stop using it, set the timer and stepless thermostat knob to zero and turn off the power at the same time.

VII、 Daily inspection:

1. Regular inspection is necessary.
2. Frequent product inspection can prevent serious accidents.
3. Feel the circuit, machine failure, to stop using.
4. Check the state of the machine before and after use every day.

Before use	1. Is the machine tilted? 2. Is the control panel damaged? 3. Is the power cord aging, cracked or broken?
Using	1. Is there any odor, odor, or vibration noise? 2. Is the temperature out of control or is there a leakage phenomenon?

VIII、 Cleaning and maintenance:

1. Before cleaning, the power should be cut off to prevent accidents.
2. After working every day, clean it with a damp cloth in time and wipe it with a neutral detergent if necessary. At the same time, it is strictly forbidden to rinse the electric cup warmer directly with water, so as not to damage its electrical components and cause personal safety accidents.
3. If not used at any time, the power switch should be turned off.
4. When not used for a long time, the stove should be cleaned and placed in a well-ventilated, non-corrosive gas warehouse.

IX、 Diagnosis of Common Fault

Failure phenomenon	The reason	Method of exclusion
Turn on the power, rotate the timer and stepless thermostat, the heating lamp will not light up, and it will not heat up.	1. The power supply is abnormal and the power is not connected. 2. The timer is damaged. 3. The stepless thermostat is damaged.	1. Check the power supply and connection lines to make the power supply normal. 2. Replace the timer. 3. Replace the stepless thermostat.
Turn on the power, rotate the timer and stepless thermostat, the heating indicator light is off, but the temperature rises.	1. The heating indicator is damaged.	1. Replace the heating indicator.
Turn on the power, rotate the timer and stepless thermostat, the heating indicator light will be on, but the temperature will not rise.	1. The heating pipe is damaged.	1. Replace the heating pipe.

The above fault items are for reference only. If a fault occurs, stop using it immediately, and notify professional technicians to check and repair as soon as possible.

PROVISIONAL DECLARATION OF CONFORMITY

Equipment Type	Model Number
Salamanders.	ES650.

Application of Territory Legislation & Council Directives(s)	
This Declaration of Conformity is issued under the sole responsibility of the importer: Adexa Direct Limited. For the object of this declaration, the essential requirements and principal safety objectives have been demonstrated. The object of this declaration conforms to the following statutory requirements and Union harmonisation legislation, and complies with the following harmonised standards: 1. (Pending) Low Voltage Directive 2014/35/EU (Pending) The Electrical Equipment (Safety) Regulations 2016 2. Electro-Magnetic Compatibility (EMC) Directive 2014/30/EU Electromagnetic Compatibility Regulations 2016 EN 55014-1:2017, EN IEC 61000-3-2:2019, EN 61000-3-3:2013 + A1:2019, EN 55014-2:2015 3. (Pending) Restriction of Hazardous Substances Directive (RoHS) 2015/863 amending Annex II to Directive 2011/65/EU (Pending) Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 Disclaimer: This Declaration of Conformity is issued based on the certifications and test reports available at the time of issuing. Pending Documentation: Low Voltage Directive Compliance Certificate, RoHS Compliance Certificate. The evaluation reports for compliance with the Low Voltage Directive 2014/35/EU and the RoHS Directive 2009/125/EC are currently pending. This Declaration of Conformity will be updated upon receipt of the required certificates to confirm full compliance with all applicable EU regulations. By issuing this provisional Declaration of Conformity, we reaffirm our commitment to completing the certification process and ensuring that the product meets all necessary requirements under the relevant EU directives once the remaining documentation is secured.
